200 PLUS SERIES CONSOLE

200 plus series consoles offer you a choice of 24 or 48 submasters plus conventional preset operation. Choose either submaster, two scene or expanded single scene operation on the fly to meet the needs of your production.

We did not forget the latest generation of LED luminaires either with a full suite of controls for multi-color LED luminaires. The console will also run up to 24 moving lights allowing you complete control of both conventional dimmers and a host of sophisticated next generation luminaires.

The 200 plus console also features 12 Effects playbacks with each effect having up to 48 steps. Effects are easy to access, record and change dynamically. All show information can be saved to a USB memory device to give you a secure back up of your show.

New to the 200 plus console is a new DMX512 capture function allowing you to capture up to 512 channels of DMX512 from a larger console and play them back. There are 12 memories available. Simple to use and set up with a wide range of features, the 200 plus series consoles are an ideal choice for facilities that need a compact and effective lighting controller.
