

ZerOS Software Release (Public Release)

Released Version:	7.13.1	Release Date:	19 May 2023
Previous Versions:	7.13	Release Date:	31 August 2022

ZerOS 7.13.1 Software Release

INTRODUCTION

Release 7.13.1 of ZerOS is a maintenance release for all consoles and servers listed below, running the ZerOS Operating System. These release notes describe the new features, enhancements and bug fixes that have been implemented between versions 7.13 and 7.13.1.

PRODUCTS AFFECTED

- ✓ FLX
- ✓ FLX S24 & S48
- ✓ ZerOS Server

ZerOS 7.13.1 will run on the following products, but they are not affected by the enhancements in this release:

- ✓ ORB Series
- ✓ Solution Series
- ✓ SCD Server & SCD Server Pro
- ✓ Leap Frog 48 & 96
- ✓ Phantom ZerOS (offline software)

COMPATIBILITY

No known compatibility issues from 7.13.

UPDATE INSTRUCTIONS

Please carefully follow the update instructions available at the end of this document.

The software installation process completely removes all data on the console, including any current show files. **If the current show file is still required, please ensure that backups are taken before proceeding with the update.** After completing the update, you may re-load your show if required.

When performing a software update it is important to ensure that the power supply to your desk is stable and reliable. Power loss during a software update can render your desk unusable.

Enhancements and Bug Fixes

ZOS-10941	Added support for additional hardware variants of SBCs
ZOS-11016	New Co-Processor firmware included
ZOS-11402	Added support for firmware updates to a new range of Co-Processors
ZOS-11456	Increased the list of supported Part Codes
ZOS-11511	New Co-Processor firmware included
ZOS-11577	Added additional production tests
ZOS-11580	Added support for variable length serial numbers

Known issues

No known issues

Software Update Instructions

INTRODUCTION

Please familiarise yourself with these update instructions before proceeding. Instructions must be followed accurately and in order. Deviations or omissions could render the desk unusable and require it to be returned to the factory for recovery.

If any difficulties are encountered at any point, or you are in doubt on any of the instructions below, then do not proceed any further with the update and contact Vari-Lite for assistance.

The software installation process completely removes all data on the console, including any current show files. If the current show file is still required, **please ensure that backups are taken before proceeding with the update**. After completing the update, you may re-load your show if required.

When performing a software update it is important to ensure that the power supply to your desk is stable and reliable. Power loss during a software update can render your desk unusable.

Consoles running ZerOS 7.8.3 or later.

To perform the update:

- Download the software from the Vari-Lite website (vari-lite.com/global/products/zeros-software)
- Save the .exe file onto a USB stick (don't put it inside any folders)
- Plug the USB stick into your console
- Press SETUP to enter the console's setup screen and choose "Load" on the monitor
- Select the file from the list displayed on screen and follow the onscreen instructions
- Once the update is complete, remove the USB Memory Stick and reboot the desk

Once all the software is up to date, you can get on with enjoying the new features in the desk software. Vari-Lite recommend printing these Release Notes and having them with you when operating the desk, as some functionality may have changed which is explained in these notes.

Consoles running ZerOS 7.8.2.39 or older.

To update a console running ZerOS 7.8.2.39 or older, please visit zero88.com/manuals/zeros/software-updates/zeros-usb-creator for instructions.
